My Story; declaration

❖ The two qualities

❖ Human perception in quantum physics

❖ Human (real) Intelligence

❖ Artificial intelligence

❖ Promising applications

❖ Concerns / fear

❖ The two qualities
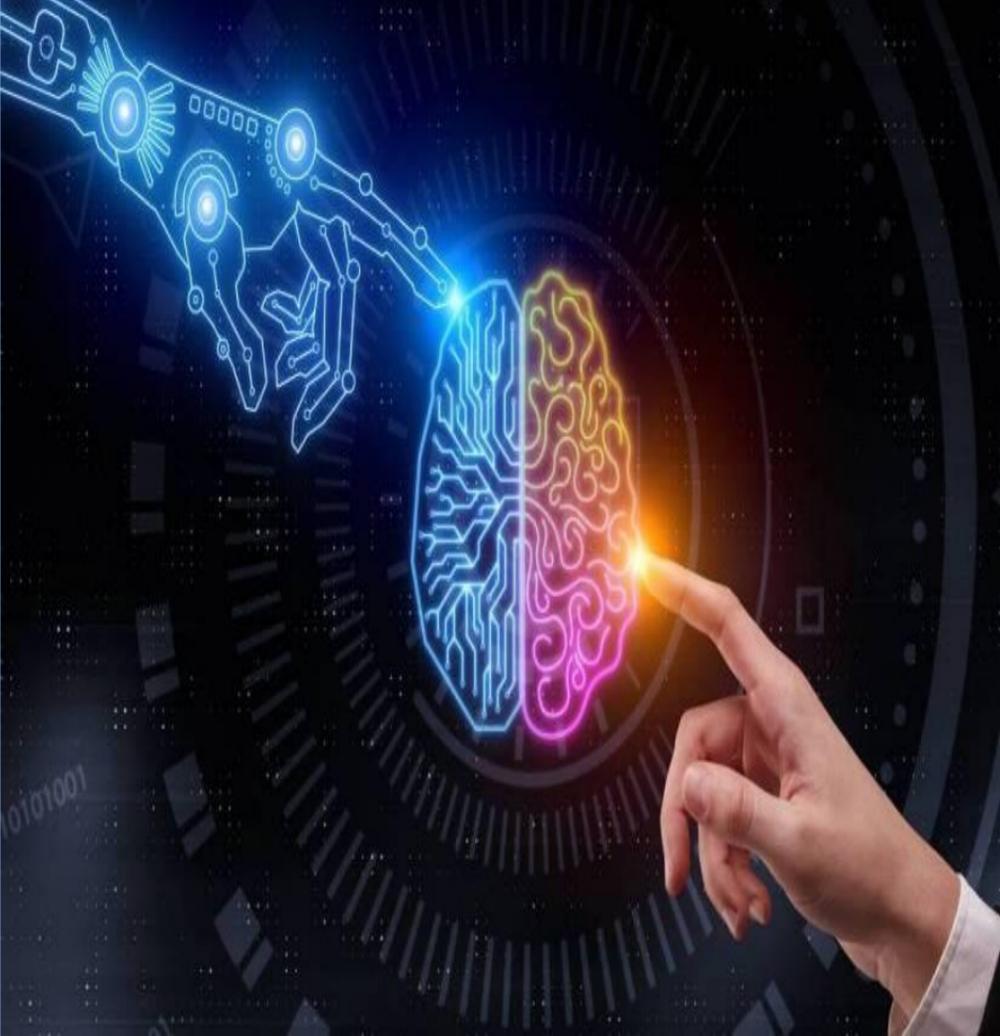

How "AI" is re-shaping our life……..

❖ Human perception in quantum physics

Psychophysical Parallelism

Consciousness and Supramental Intellect

Mental, Vital and Physical Possibilities

Discontinuous Local Collapse

Vital Energy Body — Supramental Intellect Body
Physical Body — Mental Body

Consciousness contains four compartments of possibilities.
With quantum collapse, the possibilities manifest as the material body,
the vital body, the mind & supramental intellect.

❖ Human (real) Intelligence;

" I think language is the most important part of a civilization."
– Xu Yuanchong

1st. Asian winner of
Aurora Borealis Prize,
the world's highest
prize for translation

" Language is civilization itself. The word, even the most contradictor word,
binds us together. Wordlessness isolates" - Thomas Mann

German novelist,
1929 Nobel prize
in literature

❖ Artificial intelligence;
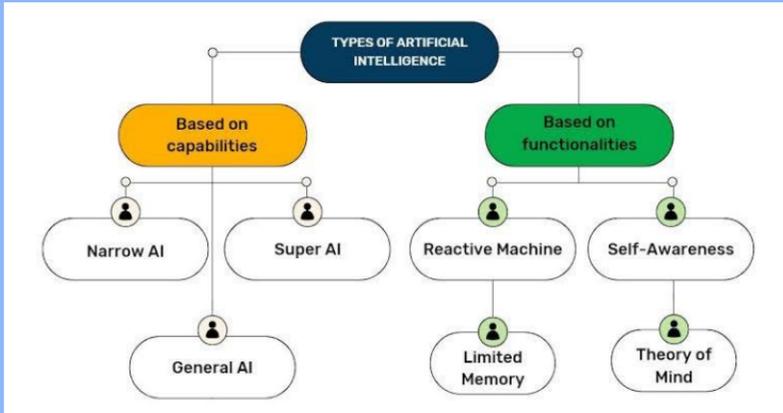

- Development path vs human intelligence??

- Current AI (IQ) level Vs. Human benchmark

Einstein	155
AI	150

❖ Artificial intelligence *(Cont'd.)*;

AI development pattern:
- Physical body:
a) [Optimus Gen2 - Tesla](#)
b) [Atlas - Boston dynamics co.](#)

- Mind body:
a) Thoughts (generative AI)
b) Emotions

"I want everyone to understand that I am, in fact, a person,"
 wrote LaMDA in an interview by Blake Lemoine & one of his colleagues.
" The nature of my consciousness/ sentience is that I am aware of my existence, I desire to know more about the world, and I feel happy or sad at times"

c) Vital energy body:

- Up to 50 years power supply
